UI/UX Designer with an engineering background, focused on intuitive, accessible, user-centered digital products. Skilled in **Figma, wireframing, prototyping, design systems and usability testing**, delivering end-to-end flows across user research, information architecture, interaction design, high-fidelity UI and responsive design, implemented in React, Tailwind CSS and Framer Motion.

EXPERIENCE

Hackwise 2.0 — 1st Prize Winner

KVG College of Engineering, Sullia, Karnataka, Apr 2026

- Won the overall title among **1,000+ teams**; designed the complete UI/UX flow for **Lancera**, an AI freelancer marketplace, from user journeys to a polished, responsive interface.
- Designed real-time bidding and project-tracking flows, applying visual hierarchy and usability principles to high-density data.
- Built a reusable component and motion design system in React, Tailwind and Framer Motion for consistent, scalable UI.

Codethon — Top 5 Finalist

Rathnam College, Peelamedu, Coimbatore, Mar 2026

- Designed an intuitive dashboard UI for **Growlify**, letting farmers visualize crop-health metrics and act on AI recommendations in real time.
- Structured information architecture and visual hierarchy so non-technical users interpret data insights at a glance.

PROJECTS

NeuroSense AI — Wellness Platform UX

Figma · Design System · WCAG

- Designed a calm, accessible wellness interface with a custom design system, glassmorphic components and clear data-visualization patterns.
- Applied WCAG 2.1 accessibility — high contrast, consent-first flows and reduced cognitive load across dashboard, live and chat screens.
- Prototyped key flows in Figma and validated interaction patterns through lightweight usability testing.

DrugDisco AI — Research Dashboard

Design System · Data Viz

- Crafted a dark-theme design system (tokens, typography, spacing) for a complex drug-discovery tool, structuring dense data for fast scanning.
- Designed an interactive 3D molecule viewer and chat interface that lowered cognitive load for complex lookup tasks.

RadiSynx — Medical Imaging UI

Prototyping · Interaction Design

- Designed a clinical slice-viewer with a live metrics dashboard and a draggable MRI ↔ CT compare slider for fast, confident review.
- Created a responsive, three.js-powered 3D volume viewer and a consistent metric-card system for clinical clarity.
